Education

Faculty of Engineering, Alexandria University, Egypt

Sep 2015 – May 2020

Bachelor of Science in Computer & Communication Engineering

Alexandria, Egypt

Experience

Senior Software Engineer

Sep 2022 – Present

Zalando

Berlin, Germany

- Led development of the **Retail Center**, processing over **1,000 daily shipments** and managing more than **1 million shipments**, significantly enhancing operational efficiency and scalability.
- Designed and implemented a supplier negotiation system, resulting in cost savings of **€7.5 million** by streamlining workflows and automating negotiations.
- Reduced bug resolution time by **80%** by creating a real-time monitoring dashboard using **Grafana** and **Lightstep** to track performance across **15+ microservices**.
- Led the migration of legacy systems to a cloud-native architecture, improving system availability by **80%** and reducing operational costs by **€2.2 million annually**.
- Contributed as the top-performing member to the codebase, receiving **two promotions** in under a year for exceptional performance and leadership.
- Actively participated in on-call rotations, ensuring **24/7 uptime**, responding to critical incidents, and minimizing downtime by resolving issues within a **60-minutes SLA**.
- Drove automation initiatives that reduced manual interventions by **50%**, improving team productivity and reducing human errors in daily operations.
- Led technical documentation efforts, ensuring the team had a comprehensive knowledge base for faster onboarding of new engineers and smoother project handovers.
- **Java, Kotlin, Spring Boot, CI/CD, Event-Driven Architecture, K8S, Grafana, SQL**

Java Engineer

Oct 2021 – May 2022

DHL Freight Enterprise

Sofia, Bulgaria (Remote)

- Worked on **Transport Management System (TMS)** which oversees customers' whole transport operation and allows them to use DHL's network regionally or nationally depending on their needs.
- Automated logistics workflows, reducing manual entry, and minimizing human error in scheduling shipments.
- Completed domain-specific training to deeply understand logistics workflows and challenges.
- **Java, Hibernate, WexVs Designer/Client (Internal Frameworks)**

Software Engineer

Jan 2021 – Jun 2022

Rubikal

Alexandria, Egypt

- Deployed Serverless functions using AWS Lambda.
- Worked directly with Transit Feed (GTFS), a data specification that allows public transit agency (Mowasalat Misr) to publish their transit data.
- Created visualizations using Tableau and Metabase, presented findings in a clean and informative way.
- Analyzed data of millions of students and extracted useful insights for clients.
- Redesigned the data pipeline, reducing the average ETL (Extract, Transform, Load) processing time by **45%** and enabling real-time data analytics for decision-makers.
- **Spring, Rails, SQL, Python, Snowflake, AWS, Metabase, dbt, Tableau, Jira**

Software Engineer

Apr 2020 – Dec 2020

Sia

Cairo, Egypt

- As a Backend Engineer, I created **+7** services such as **gamification, notifications** and **educational content** using **Micro-services** architecture within a startup of **10** people.
- Created an end-to-end CI/CD pipeline that decreased deployment time by 60%, allowing the startup to release new features at a much faster pace.
- Optimized database queries to enhance data retrieval times by 30%, improving overall system efficiency and response times for users.
- **Spring Boot, Angular, AWS, Docker, Jenkins, Kotlin, Jira**

Part-time

Software Engineer

Oct 2021 – Present

Cynopsis Solutions

Singapore (Remote)

- Spearheaded the development of a real-time transaction monitoring tool, detecting and analyzing patterns in over **100K daily transactions**, contributing to enhanced fraud detection and compliance adherence.
- Optimized transaction processing performance, achieving a **300%** improvement in insertion speed, significantly reducing latency and resource usage.
- Refactored and optimized legacy Python codebase, reducing technical debt by **25%**, while improving overall system maintainability, scalability, and reliability.
- Engineered a high-performance, multi-threaded data processing system capable of handling up to **1 million transactions daily**, boosting system throughput by **40%** and ensuring seamless data integrity.
- **Django, Django REST Framework, AWS, Python, Celery, ECS, TimeScaleDB, Postgres**

Cloud Native Engineer

Oct 2020 – Feb 2021

DHL Freight Enterprise

Cairo, Egypt

- Led the migration of monolithic applications to a **Serverless architecture**, improving system scalability and cutting operational costs by 35%.
- Converted legacy PHP Laravel codebase into highly efficient **Azure Functions** using **Entity Framework**, reducing latency by 40% and ensuring seamless integration with existing services.
- Automated deployment pipelines using **Gitlab CI/CD**, reducing deployment time by 60% and minimizing human errors in the production environment.
- Enhanced database performance through optimized integration with **CosmosDB**, increasing data retrieval speeds by 25% while maintaining high availability.
- **Entity Framework, Azure Functions, CosmosDB, Laravel, Gitlab, Serverless**

Software Engineer

Aug 2018 – April 2020

Robo-Tech

Alexandria, Egypt

- Developed and implemented a robust communication system for **Remotely Operated Vehicles (ROVs)**, reducing packet loss to less than **0.01%** and improving overall system reliability.
- Designed and launched **2 ROV prototypes**, leading to successful testing under various underwater conditions and gaining client approval for mass production.
- Optimized the vehicle's navigation system using **OpenCV**, enhancing object detection accuracy by 30% in real-time.
- Collaborated with a cross-functional team of engineers, improving development cycles and reducing prototype delivery times by 20%.
- **C++, Qt, C#, OpenCV**

Technical Skills

Languages: Java, Kotlin, Python, TypeScript, C/C++, Ruby, SQL

Frameworks and Tools: Spring Boot, Django, Node.js, Rails, Kafka, MongoDB, Celery, PostgreSQL, Tableau, Swagger, Mockito, Angular, React.js, AWS, Azure, Docker, Git, Linux, Jira
